Innovative Pedagogical Approaches in Early Childhood Care and Education (ECCE) in the Asia-Pacific region: A Resource Pack

Maki Hayashikawa
Chief, Section for Inclusive Quality Education
UNESCO Bangkok
A joint initiative of UNESCO Bangkok and the ARNEC in collaboration with UNICEF and the OMEP with financial support from the MEXT, Japan.

The project aimed at contributing to improved equity and quality of ECCE provision in Asia and the Pacific through two lines of action:

- increasing the political commitment of Asia-Pacific countries to improving the equity and quality of ECCE and
- providing early childhood teachers and teacher educators in Asia and the Pacific with access to tools, approaches and information that support effective and innovative pedagogies in teaching and learning.
‘Innovative pedagogical approaches’ – what are they?

- An interactive approach to facilitating and extending children’s learning in a specific social, cultural or physical context;
- An approach whose implementation can strengthen the capacity of teachers, practitioners and/or caregivers;
- An approach whose process of implementation can be documented in order to inform others about how to incorporate/adapt such innovative approaches in their own contexts.
Six principles

The cases being documented demonstrate one or more of the following principles:

- **Child-centred**: (child as a competent, active learner): Learning involves culturally-relevant, negotiated, respectful interactions between children and teachers / practitioners / caregivers;

- **Holistic development**: Learning incorporates a focus on linkages between socio-emotional; physical; cognitive; linguistic; spiritual development;

- **Equity**: Quality learning opportunities are available to all children without discrimination, especially those from marginalized groups;

- **Inclusiveness**: Learning responds to the diversity of needs among all learners;

- **Sustainability**: (i) The innovation presented is coherent with other activities of the programme and has potential for continued utilisation, and (ii) builds children’s skills to affect social change for now and in the future;

- **Cultural reflection/relevance**: Learning is rooted in the learners’ socio-cultural context and reflects traditional/indigenous knowledge that supports children’s development and learning.
A Resource Pack

This resource pack is meant to support:

- Practitioners, educators and researchers;
- International development partners; and
- Policy development professionals.
A Resource Pack

Table of contents

- Introduction
- Conceptual Framework
- Documentation Process
- Innovative Pedagogies
  - 9 documented cases: Innovative pedagogical approaches from Australia, China, India, Japan, Nepal, New Zealand, Pakistan, the Solomon Islands and Thailand
- Synthesis of Insights and Findings
- Conclusion
The Nine Documented Cases

Innovative Pedagogical Approaches from: Australia, China, India, Japan, Nepal, New Zealand, Pakistan, the Solomon Islands and Thailand

On-Country Learning: Murdoch University, Australia
Sihuan Playgroup, Beijing, China
The Education for Children of Migrant Labour, Bengalaru, India
Kaede Kindergarten, Hiroshima, Japan
Educate the Future (EtF), Save the Children Nepal
Te Puna Reo o Nga Kakano; Wellington, New Zealand
Broadclass Listen to Learn: POWER99 Foundation, Pakistan
Save the Children Early Child Development Centres, Solomon Islands
Mother-tongue based Early Childhood Care and Education: Foundation for Applied linguistics, Chiang Mai, Thailand
Each documented case contains following:

- Introduction
- Description of the approach
- What makes this approach innovative?
- Personal Story
- Conclusion
- Next Steps
- About the Video
- Discussion Points
Synthesis of Insights and Findings

Key features reflected across the nine cases:
- Include innovative pedagogical approaches that

- **Empowerment**
  - Teachers and ECCE Facilitators
  - Children, parents, communities and elders

- **Overcoming Challenge**
  - Overcoming significant challenges, related to availability of resources, social prejudices and marginalization

- **Transforming**
  - Transforming communities and children’s lives
  - Powerful changes in both perceptions and practices

- **Building and Sustaining**
  - Building on existing capacity and maximize sustainability
Conclusion

The nine cases incorporate:

- Mobilisation of local communities to participate in supporting children’s learning environments;
- Adaptation of well-established systems and curricula to make space for localised learning and identity development;
- Expression of unique cultural values and experiences in the planning and implementation of children’s learning experiences;
- Introduction of child-centred learning approaches through free play, child-initiated activities and the use of open-ended questions in engaging children;
- Innovative use of radio to engage practitioners / facilitators in active learning with their children;
- Provision of professional development opportunities to ECCE facilitators (including the skills of reflective practice and contributing to practitioner networks referred to earlier), even in the most resource-constrained environments, and
- Use of culturally-responsive teaching and learning strategies, such as mother tongue learning and engagement with the natural environment, to value children’s cultural heritage and identity.
