REGIONAL WORKSHOP ON THEMATIC ISSUES FOR ESD – MTT PROJECT

ESD RESEARCH SESSIONS

INTRODUCTION

The session will build on the work of previous two workshops and the discussions of the Meeting of Experts held in Bangkok during November 2008. The session will also require all participants to bring with them ESD interests, ideas, plans and any experience of research projects they have been associated with over the past few years. It is the intention where possible, to feed these experiences into the workshop session on research. It will also be valuable for the workshop resource person to have as much of this information as early as possible before or during the first few days of the workshop, so that the TASK activity, will be both relevant and meaningful. The session will be structured as follows:

SESSION A

BRIEF REVIEW OF RESEARCH MODELS USED IN EDUCATION AND OTHER SOCIAL SCIENCES

SESSION B

ANALYSIS OF SELECTED ESD RESEARCH STUDIES AND PROJECTS

SESSION C

WORKSHOP TASK : DEVELOPING A PLAN FOR A SMALL SCALE ESD RESEARCH PROJECT
