UNESCO-KEDI 2015 Asia-Pacific Regional Policy Seminar
Monitoring and Evaluation Systems, the Data Revolution, and Education 2030

26-28 November 2015, Bangkok, Thailand

Break out session
Strategies for Strengthening M&E

- M&E systems should be designed or redesigned to meet emerging needs for the 2030 education agenda.
  - Focus on adapting the 2030 agenda into education master plan
  - Build an EMIS system to conceptualize internal and external indicators that incorporates the 2030 agenda.
- Challenge:
  - Database linkage
  - EMIS system follows current infrastructure
  - Data analysis capacity to adhere to reporting needs
Capacity

- Capacity development should consider the current infrastructure capabilities and identify key areas to develop
  - Focus on teaching the trainer concept.
Data Effectiveness

- Develop a matrix system to identify data points
- Build internal reports to validate data
Coordination

- Adapt MOU’s to streamline data collection
Resources

- Identify a unit to oversee M&E operations and allocate funds
- Develop an M&E framework and identify and deploy personnel to all areas that cover the 2030 agenda.
