Reflection on the workshop and next steps

Country: Bangladesh
You will be given 10 minutes to present your responses to the following questions

Question 1:
• Reflecting upon the national assessment programme you introduced on Day 1, please present 4-5 things you have learned from the workshop which you feel will be useful in improving this assessment programme.

Question 2:
• Please share 4-5 things that you plan to improve in regard to your assessment programme based on what you learned from the workshop.

Question 3:
• Within the framework of NEQMAP’s planned activities, how would you suggest that we collaborate with your institution/organization in order to improve student learning assessment in your country?

Please move to the next slide for the template to follow.
What you have learned? | What will you improve?
---|---
1 | The philosophy of assessment: what, why, when, how and for whom
2 | Assessment is to collect information to develop students performance
3 | Develop assessment framework, test items and rubrics. Analyzing data (RM)
4 | Findings of assessment should usable for further development of students learning
5 | Assessment make an image of the student to the teacher. More assessment more dimensional image.
Achievements from this program

1. Competency based assessment
2. Analyzing data for the betterment of students learning
3. Differentiate students performance and ability
4. Flowing developmental continuum
5. Flowing significant rubrics
Within the framework of NEQMAP’s planned activities, how would you suggest that we collaborate with your institution/organization in order to improve student learning assessment in your country?
