‘Embrace digital technology for better teaching, learning experience’

Summary: more-in Digital technologies would help in improving teaching methods while digital learning can improve student achievement if the tools are integrated into teaching and learning, according to I.V. Subba Rao, Chief of Literacy, Basic Education and Non-formal Education at Unesco.

more-in Digital technologies would help in improving teaching methods while digital learning can improve student achievement if the tools are integrated into teaching and learning, according to I.V. Subba Rao, Chief of Literacy, Basic Education and Non-formal Education at Unesco. A panel discussion on ‘pedagogy and teacher in the digital era’ was held at the Navyandhra Pustaka Sambaralu (book festival) here on Friday. On the occasion, Mr. Subba Rao said that technology would act as an assistant to a teacher. Subba Rao, Chief of Literacy, Basic Education and Non-formal Education at Unesco.

Both teaching and learning processes would be simplified and improved with digital technologies. Time and space were no barriers to learning through open online courses. At the same time, digital technologies would not eliminate the teacher from the learning process as human interface was a must in this aspect, he said. “There may be platforms such as Skype to communicate in real time.
